DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, drawn to a self-venting microwave cooking container, classified in class 219, subclass 735.
- II. Claims 9-11, drawn to a self-venting microwave cooking container, classified in class 219, subclass 735.
- III. Claim 12, drawn to a method of microwave cooking, classified in class 219, subclass 678

The inventions are distinct, each from the other because of the following reasons:

Inventions both Groups (I and II) and Group III are related as product and process of use.

The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process can be practiced with another and materially different product such as one with or without a second lower opening in a bag portion.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to John Moriarty on 3-7-2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
